

IFC-2341

Carboxylated Styrene-butadiene Copolymer Dispersion

Technical Data Sheet

Name: IFC-2341

Revision Date: 2023-08-04

Version:1.3

Product Description

IFC-2341 is Carboxylated styrene-butadiene copolymer dispersion Benefits with strong penetration and adhesion, it can be used as a single-component waterproof agent for direct spraying.

IFC-2341 can form a hard attachment with the sand particles on the base surface and has the effects of waterproof, anti-alkali, anti-mold, anti-sanding, anti-cracking, etc.

Properties

- 1.Promotes high adhesion to various substrates.
- 2.Enhance impact resistance.
- 3.Excellent water resistance.
- 4.Excellent heat resistance.
- 5.Quick drying time.

Characteristic data*

Property	Value	Unit
Type	Styrene-butadiene copolymer	
PH	7.0-8.0	
Viscosity	1000-7000	mPa·s
Solid content	47.0±1.0	%
Tg	-10	°C

*These properties are typical but do not constitute specifications.

Storage

The product should be stored in dry condition below 30°C with the integrity of the packaging, and prevented from direct sunlight. The validity of this product is for 6 months, performance assessment is recommended before use after shelf life. The product should be protected from freezing during storage. It is suggested to filter before application and use up once the package is open.
