

IFCA-250

Antiseptic

Technical Data Sheet

Name: IFCA-250

Revision Date: 2023-08-04

Version:1.3

Product Description

IFCA-250 is an aqueous liquid broad-spectrum bactericidal preservative based on a complex of isothiazolinones and DM. It is low irritation, contains formaldehyde slow-release body, is effective against common bacteria, fungi and yeasts in water, and can effectively prevent microbial infestation at low dosage. It can effectively prevent microbial infestation at low dosage. IFCA-250 has excellent miscibility with water, does not produce foam, is non-flammable and has low toxicity. It is easy to decompose in the environment and will not cause cumulative pollution to the environment.

Characteristic data*

Property	Value	Unit
Active component	5-Chloro-2-methyl-4-isothiazolin-3-one (CMI) 2-methyl-4-isothiazolin-3-one (MI)	
Appearance	Light blue transparent liquid, slight characteristic odor	
PH (25 °C)	3.5±1.5	
Density	1.05±0.05	20°C, g/cm ³
Dissolubility	Completely soluble in water, low molecular alcohols and glycols	

*These properties are typical but do not constitute specifications.

Instruction

It is recommended to add 2-5%, the dosage depends on the different kinds of emulsions and the protection needs of different products, and also affected by different microbial infestation degree. The dosage should be adjusted accordingly according to different products. Before using, pay attention to the PH value of the system, and avoid the system residual reducing substances and nucleophilic substances. Our testing center can help customers to test the recommended dosage under special formulations.

IFCA-250

Minimum Inhibitory Concentration (MIC/ppm)

Staphylococcus aureus	50	Pseudomonas aeruginosa	50
Pseudomonas malodorans	60	Escherichia coli	60
Pseudomonas fluorescens	50	Candida albicans	200
Penicillium	350	Aspergillus niger	400

Storage

The product should be stored in dry condition between 5~35°C with the integrity of the packaging, and prevented from direct sunlight. This product should not be in contact with reducing metals (such as metal iron, aluminum, etc.) during storage, and should not be in contact with oxidizing or reducing substances. The validity of this product is for 12 months, performance assessment is recommended before use after shelf life. The product should be protected from freezing during storage. It is suggested to filter before application and use up once the package is open.

Disclaimer

Foshan Shunde Infinechem Co., Ltd. recommends that customers should check with Materials Safety Data Sheet (MSDS) for details about safety instructions. We also suggest that you contact the suppliers of other materials used in our recommended formulations and consult appropriate health and safety regulations prior to use.
