

# IFC-7205

Waterproofing emulsion for PVC floor glue

## Technical Data Sheet

Name: IFC-7205

Revision Date: 2023-08-07

Version:1.3

### Product Description

IFC-7205 is a kind of water-soluble eco-friendly construction adhesive specially designed for PVC flooring, which belongs to Vinyl acetate-acrylate emulsion.

IFC-7205 has the characteristics of good initial adhesion, good adhesion to PVC flooring and good wire drawing property.

### Properties

1. Good compatibility with powder
2. Excellent flexibility
3. Good low temperature performance
4. Excellent water resistance

### Characteristic data\*

| Property      | Value                            | Unit |
|---------------|----------------------------------|------|
| Type          | Vinyl acetate-acrylate copolymer |      |
| Appearance    | Milky White liquid               |      |
| PH (25°C)     | 5-6                              |      |
| Viscosity     | 3000-6000                        |      |
| Solid content | 56.0±1                           | %    |
| MFFT          | -20                              | °C   |
| Ionicity      | Anionic                          |      |
| Grain size    | 0.1-0.3                          | µm   |

\*These properties are typical but do not constitute specifications.

### Storage

The product should be stored in dry condition between 0~40°C with the integrity of the packaging, and prevented from direct sunlight. It cannot be applied directly to PVC flooring. The validity of this product is for 6 months, performance assessment is recommended before use after shelf life. The product should be protected from freezing during storage. It is suggested to filter before application and use up once the package is open.
