

# IFC-2841

Waterproof redispersible polymer powder

## Technical Data Sheet

Name: IFC-2841

Revision Date: 2023-07-20

Version:1.3

### Product Description

IFC-2841 is an waterproof redispersible polymer powder formed by spray drying of acrylate copolymer emulsion. The addition of acrylic powder can improve the construction property of dry powder mixture, strengthen the adhesion to substrate with good waterproof, weather resistance and alkali resistance.

### Properties

1. Improve the construction property of dry powder mixture
2. Strengthen the adhesion to substrate
3. Good waterproof, weather resistance and alkali resistance

### Application

1. Waterproof mortar
2. Repairing mortar
3. Dry powder stone-like coating
4. Dry powder texture coating
5. Dry powder latex coating
6. Cement products
7. Non-cement based color mortar

### Characteristic data\*

Property	Value	Unit
Based Polymer	AE/SM	
Appearance	White powder, free-flowing	
Solid Content	≥98.0	%
PH	7-8	
Ash Content	13±2	%
MFFT	≤0	°C
Tg	0	°C
Bulk Density	400-600	
Particle Size	80-120	

\*These properties are typical but do not constitute specifications.

# IFC-2841

## Storage

The product should be stored in dry condition between 10~35°C with the integrity of the packaging, and prevented from direct sunlight. The validity of this product is for 6 months, performance assessment is recommended before use after shelf life. The product should be protected from freezing during storage. It is suggested to filter before application and use up once the package is open.

## Disclaimer

Foshan Shunde Infinechem Co., Ltd. recommends that customers should check with Materials Safety Data Sheet (MSDS) for details about safety instructions. We also suggest that you contact the suppliers of other materials used in our recommended formulations and consult appropriate health and safety regulations prior to use.
